

COURSE SPECIFICATION DOCUMENT

Academic School/Department:	Psychology
Programme:	Psychology
FHEQ Level:	5
Module Title:	Health Psychology
Module Code:	PSY 5425
Total Hours:	120
Timetabled Hours:	45
Guided Learning Hours:	0
Independent Learning Hours:	75
Credits:	12 UK CATS credits 6 ECTS credits 3 US credits

Module/Course Description:

Although nowadays people live longer and are currently 'healthier' than in the past, not everyone has a sense of improved health or wellbeing. Health Psychology analyses the biopsychosocial factors which contribute to and maintain illness/disease in contemporary society. Health Psychology aims to improve wellbeing by applying psychological theories, methods and research to the promotion of health; prevention and treatment of illness and disability; analysis and improvement of the health care system and; health policy formation.

Prerequisites:

PSY 4215 Biological Basis of Human Behaviour

Aims and Objectives:

This course is designed to provide an overview of current health psychology topics and serve as an introduction to an applied field of psychology. Lectures will introduce topics in health psychology such as current trends and interests on health psychology; how to conduct research in health psychology; health myths; stress and illness; pain; living with chronic and terminal conditions; sleep disorders; smoking and alcohol consumption. Students are expected to develop a sound understanding of health psychology interventions strengths and limitations.

Programme Outcomes:

Psychology: 5Aii, 5Aiii, 5Ci, 5Ciii, 5Di, 5Diii

A detailed list of the programme outcomes is found in the Programme Specification. This is maintained by Registry and located at:

<https://www.richmond.ac.uk/programme-and-course-specifications/>

Learning Outcomes:

- Show a systematic understanding of contemporary topics in the field of health psychology;
- Demonstrate a critical understanding of the biopsychosocial model of health psychology;
- Summarise and critique ideas and debates in the field by developing a health intervention programme.
- Be able to demonstrate critical understanding of the relationship between a socio biopsychological approach to health and the different research/clinical topics in the field.
- Enable students to conceive, develop and present a self-directed project in health intervention.
