

COURSE SPECIFICATION DOCUMENT

Academic School / Department:	Science, Innovation & Technology
Programme:	MSc Project Management for Sustainability
FHEQ Level:	7
Course Title:	Project Research Methods
Course Code:	PMG 7000
Total Hours:	200 (standard 4 credit MA course)
Timetabled Hours:	39
Guided Learning Hours:	21
Independent Learning Hours:	140
Credits:	20 UK CATS credits 10 ECTS credits 4 US credits

Course Description:

This course fosters knowledge, skills and practical understanding of research methodologies conducive to sustainable project management. Framed within both macro-level international policy frameworks and micro-level, local needs and challenges, it explores a range of approaches to environmental, administrative, economic and social areas of sustainability in the field. Integral to the course is engagement with leading research and professional practice, a multidisciplinary, practice-led and experimental ethos and a hands-on process.

Prerequisites:

None

Aims and Objectives:

To foster the development of multidisciplinary, practice-led research capable of bringing about sustainable project management. To situate sustainable project management research methodology within evidence-based needs and challenges, leading research and professional practice within the field. To apply research methodology to the design of sustainable project management.

Programme Outcomes:

A1, A4, B1, B3, B4, D2.

A1. Have a systematic and deep understanding of relevant knowledge about the management of projects, their external context, and the detailed relationship between these and their application in practice.

A4. Identify the need for decisions about natural resources to involve judgements, not just about economic viability but about risks to future ecological, social or cultural wellbeing.

B1. A critical awareness of current issues in project management which is informed by leading edge research and practice in the field as well as by a proactive and independent approach to learning.

B3. Skills to link the environmental, social, and economic actions to cultural considerations.

B4. A historical knowledge and an understanding of the consequences of past actions to envision how futures may be shaped.

D2. Demonstrate the capacity for independent, evidence-based integrated thinking as the foundation for developing their personal ethical code.

A detailed list of the programme outcomes are found in the Programme Specification.

This is located at the archive maintained by Registry and found at:

<https://www.richmond.ac.uk/programme-and-course-specifications/>

Learning Outcomes:

By the end of this course, successful students should be able to:

- Situate project management research activities within contextual, ethical, and social knowledge of sustainable project management design.
- Synthesise and draw on a range of knowledge making practices in project design.
- Apply hindsight and foresight when making choices, judgements and decisions around approaches to knowledge making in the field.
- Use skills and technologies conducive to innovative knowledge making in the field.

Indicative Content:

- Quantitative research methods: technology as method; metrics as method.
- Qualitative Research including sensory, affect based and non-representational research.
- Decolonizing research methods.

- Policy as method.
- Community as method.

Assessment:

This course conforms to the University Assessment Norms approved at Academic Board and located at: <https://www.richmond.ac.uk/university-policies/>

Teaching Methodology:

Teaching will be a combination of lectures, seminar discussions and workshops, using case studies and drawing on students' own experiences where appropriate. Lectures will be designed to cover the fundamental issues and build upon the recommended book chapters from the reading list and additional recommended readings. Students will be advised to supplement lecture notes by reading the relevant indicative text(s). Weekly discussions and formative feedback will support and enhance student learning through the exploration and application of their understanding of business strategies. This is supported by a proactive use of Blackboard VLE to support guided, independent and online learning.
