Lectures:	30
Seminar / Tutorials:	15
Independent / Guided Learning:	75
<b>Semester:</b>	Fall, Spring
<b>Credits:</b>	12 UK CATS credits 6 ECTS credits 3 US credits

**Course Description**

This course examines the financial needs of corporations and the range of mechanisms available to meet them. A review of basic financial statement analysis leads into consideration of working capital management. The key concept of the time value of money is applied to bond and equity valuation as well as capital budgeting. The basic Capital Asset Pricing Model is examined, as a key component of WACC calculation. Varying corporate financial requirements are considered including comparison of internal and external sources of funds, their relative availability, and costs. Final topics include capital structure and dividend policy, and ideas of Modigliani and Miller.

**Prerequisites:**

ACC 4200 and ACC 4205 and MGT 4205

**Aims and Objectives:**

This course examines the financial needs of corporations and the range of mechanisms to meet them. The concept of time value of money is extended to financial investment valuation and capital budgeting. Other basic theories of finance are introduced, including CAPM. Further concepts include short- and long-term financial management, optimal capital structure, and risk versus return.

**Programme Outcomes:**

Business Management:

A1–A7

B1–B5

C1, C2

D1–D5

Accounting and Finance:

A1-A5

B1, B2
