Teaching Methodology:

The course will be taught through a combination of lectures and seminar classes. Lectures are primarily designed to give an overview of the issues and problems on a particular topic, and thereby provide guidance for seminar discussion. Seminars will be used for debates and group/sub-group discussion, and are intended to provide an interactive and participatory learning environment. Students are expected to do the set readings for each week, and to be prepared to contribute to class discussion and discussion sub-groups. The general approach to classes is informal, and discussion is viewed as an essential part of learning. Where possible the course will make use of class visits. Students are expected to use the class visits as an opportunity to apply concepts and ideas developed in lectures, as well as to collect further information and impressions to provide a basis for subsequent class discussion.
