Course Description:

The theories of international relations (IR) are best introduced through a study of the classic texts and debates in the discipline. This course examines most of the theories and approaches to international politics, as well as their historic foundations. It begins with some philosophical debates regarding the purpose of theorising, the importance of understanding ontological and epistemological assumptions and the difference between 'understanding' and 'explaining' in international relations theory. The course then critically evaluates the grand and middle range theories of IR, followed by a multitude of multidisciplinary approaches to conceptualising global politics and the post-positivist critiques. The course provides students with a set of conceptual and analytical tools in order to acquire a deeper and more nuanced understanding of international relations and global politics.

Assessment:

This course conforms to the University Assessment Norms approved at Academic Board and located at: <https://www.richmond.ac.uk/university-policies/>

Teaching Methodology:

This course will be taught through a combination of lectures and seminar-type activities, including group work, sub-group activities, classroom discussion, and the showing of documentaries. The general approach to classes is informal, and discussion is viewed as an essential part of an interactive and participatory learning program. Audio-visual aids, study materials and electronic learning resources will be used as appropriate.

Lectures provide a framework for the course and are designed to ensure students have an overview of main issues and concerns on a particular topic, receive clarification on the major points of debate understand the broad dimensions of core problems, and are aware of relevant literature in the specific area of concern. It is essential that lectures are supplemented with assigned readings; together, the readings and the lectures are designed to provide guidance for seminar discussion.

Seminar classes are based on the principle of active and student-directed learning, and are designed to be Safe, Enjoyable, Managed, Inclusive, Necessary, Academic, Respectful & Stimulating. The seminars provide an opportunity for discussion of contentious issues, addressing questions and exploring academic debates in more depth, group and sub-group discussion. They are encouraged to share their opinions freely but must also maintain respect for the opinions of others. It is expected that students will participate regularly in discussions in a creative, competent, and critical way, as the formulation of their own thoughts and clarification of their assumptions, often in contradiction to other students' thoughts and assumptions, form a crucial part of the learning process. Students are expected to come to seminar classes prepared.
