Introduction

This document describes the **Master of Arts in Film: Science Fiction and Fantasy** awarded by Richmond American University in London, using the protocols required by *The Framework for Higher Education Qualifications in England, Wales, and Northern Ireland* (QAA, 2008).

The degree is delivered at a US Liberal Arts university with a degree structure in line with comparable MA degrees in the UK. Successful students complete 8 courses amounting to 36 US / 180 UK credits, comprised of coursework (24 US/ 120 UK credits), and either an internship (4 US/ 20 UK credits) and a Professional project (6 US/ 30 UK credits) component or an Extended Professional project (10 US/50 UK credits). Normally, each course carries 4 US/20 UK credits.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided.

More detailed information on the learning outcomes, content, and teaching, learning and assessment methods of each course can be found in course specification documents and syllabi.

The accuracy of the information contained in this document is reviewed by the University and may be verified by the Quality Assurance Agency for Higher Education.

1. OVERVIEW

Programme/award title(s)	Master of Arts in Film: Science Fiction and Fantasy
Teaching Institution	Richmond American University in London
Awarding Institution	Richmond American University in London
Date of last validation	October 2019 (for five years)
Next revalidation	2024-25
Credit points for the award	36 US credits 180 UK credits (FHEQ Level 7)
Programme start date	September 2020
Underpinning QAA subject benchmark(s)	QAA Masters Degree Characteristics (February 2020): For contextualization, Honours degree level subject benchmark statement for History of Art, Architecture and Design (2019)
Professional/statutory recognition	N/A
Language of Study	English
Duration of the programme for each mode of study (P/T, FT,DL)	FT (one year, if Fall start), PT (two years, if Fall start) FT (one year and four months, if Spring start), PT (two years and four months, if Spring start)
Dual accreditation (if applicable)	Middle States Commission on Higher Education (First accredited 1981; renewed 2016. QAA – Higher Education Review (AP) December 2017
Date of production/revision of this specification	May 2023 (see chart at the end of this document for list of revisions)

2. ABOUT THE PROGRAMME

Richmond University's MA in Film: Science Fiction and Fantasy programme offers sustained engagement with the science fiction and fantasy film, television, and other visual media from an intercultural perspective, training students in the professional skills required for career placement in production and cultural industries. The programme brings film historians, theoreticians, professional practitioners and studio artists together to 1) offer a thorough grounding in the interdisciplinary theoretical and methodological issues related to the study of the visual, and 2) equip students with the professional skills and experience to work successfully in a variety of arts and cultural industries.

Programme Goals

- To provide students with a thorough grounding in the interdisciplinary theoretical and methodological issues for the study of science fiction and fantasy film, television, media and visual culture;
- To equip students with the key skills, knowledge and experience for careers in the arts and creative cultural industries, and for Doctoral research;
- To train students to apply their accumulated experience, knowledge and skills to their personal lives, developing appreciation of cultural commonality, diversity and difference;
- To maintain academic standards equal to or better than comparable MA degrees offered by UK universities.

3. PROGRAMME STRUCTURE

Master of Film: Science Fiction and Fantasy Degree

The programme is a discrete and self-contained programme of 36 US/180 UK credits. As such, the structure does not follow the progressive UK PGDip ► MA structure of some other programmes although a UK PGDip is awarded as an exit award in recognition of students who complete the required 24 US / 120 UK credits of taught course work. It is not possible for students to register for the PGDip.

The programme is delivered over one academic year full-time or two-years part-time from the start of September or January. Full-time students take six mandatory taught courses of 4 US/20 UK credits each, spread equally over the autumn and spring semesters. Then in the final semester, students may take the internship course of 4 US/20 UK credits and write the research project which is submitted at the end of the summer and is weighted at 8 US/40 UK credits. Students must complete the six mandatory taught courses before progressing to the internship/research project. Part-time students take one or two courses in the autumn and spring semesters, completing the required course work over two years and complete the internship and research project in the final semester of year two. Full-time or part-time students unable to take the credits instead of the normal project of 10,000 words.

US credit is equivalent to one contact teaching hour per week and each course typically involves three to four contact hours per week over a 15 week semester, except the professional research project which requires self-directed learning with academic supervision, and the internship which requires part-time work placement. There is a ratio of 1 US to 5 UK credits at FHEQ Level 7.

Details of the University's degree programmes, including approved Programme Specifications and Course Specification Descriptions (CSDs) are held in an official archive by academic year, available at <https://www.richmond.ac.uk/programme-and-course-specifications/>

All students on Masters programmes are expected to be in London for thesis/dissertation supervision and seminars. During this, students wishing to complete an internship outside of the UK must first consult with Student Affairs to discuss any visa implications before accepting an international internship.

Successful students complete 36 US /180 credits at *FHEQ* Level 7

		US Credits	UK Credits
FHEQ Level 7 (Total)		36	180
FALL SEMESTER	Course Title		
AVC 7100	Research Methods	4	20
FLM 7100	Science Fiction and Fantasy: Industry	4	20
FLM 7101	Digital Storytelling	4	20
SPRING SEMESTER			
AVC 7105	Visual Cultures	4	20
FLM 7102	Science Fiction and Fantasy: Storytelling	4	20
FLM 7103	Edutainment Video Essays	4	20
SUMMER SEMESTER			
EITHER both:			
FLM 7500	Thesis Research	8	40
FLM 7902	Internship	4	20
OR both:			
FLM 7505	Final Film Project	8	40
FLM 7902	Internship	4	20
OR only:			
FLM 7550	Extended Thesis	12	60

US Postgraduate Certificate (PGC) / UK Postgraduate Diploma in Film: Science Fiction and Fantasy

The US Postgraduate Certificate (PGC) and UK Postgraduate Diploma (PGDip) in Film: Science Fiction and Fantasy are awarded to students registered on the MA who have successfully completed in good academic standing (with a 3.0 GPA/B average) for all courses but: 1) fail to submit the final professional research project (without extenuating circumstances eligible for resubmission), or 2) fail to pass the professional research project. Both awards are therefore conferrable as exit awards in recognition of successful completion of postgraduate coursework, but it is not possible for students to register on the US PGC or the UK PGDip.

Successful students complete 24 US / 120 UK credits at *FHEQ* Level 7

Successful students awarded the exit awards are able to demonstrate all learning outcomes for the MA except the professional research project component – see ‘H’ in Section 4 “Programme Outcomes” below, and in the Curriculum Map (Appendix I below).

4. PROGRAMME OUTCOMES

Programme-level learning outcomes are identified below, based on *SEEC* categories linked to level 7 of the *FHEQ*.

Refer to Appendix II – Curriculum Map for details of how outcomes are deployed across the programme of study.

Upon successful completion of the **MA Film: Science Fiction and Fantasy degree** successful students will be able to:

- A.** A comprehensive and systematic knowledge and understanding of film and fantasy storytelling in theory and an exploration of industry practices.
- B.** A sophisticated visual literacy and critical engagement with texts, film and art/visual objects.
- C.** The ability to conduct successful autonomous research in the field of film and fantasy storytelling at postgraduate level.
- D.** The knowledge and skills for application to careers in the arts and creative cultural industries.

Subject specific knowledge and understanding (A)

- A1. Demonstrate a comprehensive and systematic knowledge of theories and methods required for examining film in an international setting, drawing on fantasy film analysis and industry, and visual culture studies
- A2. Show a sophisticated understanding and appreciation of a multidisciplinary culture
- A3. Demonstrate a critical knowledge of professional practice in fantasy film genres and creative cultural industries

Programme specification and curriculum map – MASTER OF Film: Science Fiction and Fantasy Degree

Subject specific skills and attributes (B)

- B1. Deploy sophisticated visual literacy including formal analysis
- B2. Show systematic, critical engagement with texts and objects
- B3. Conduct successful and original research, including the application of appropriate methodologies for locating, assessing and interpreting primary sources
- B4. Show excellent writing skills including logical and structured narratives and arguments supported by relevant primary and secondary evidence
- B5. Demonstrate professional presentation skills including verbal visual analysis, communicated clearly to specialist and non-specialist audiences
- B6. Deploy the skills and experience required to work in the arts and creative cultural industries

Transferable intellectual and personal attributes (C)

- C1. Communicate clearly, effectively and professionally information, arguments and ideas in written, spoken or other form using appropriate visual aids and IT resources, as well as an ability to listen effectively, and thus to participate constructively in discussion with team members
- C2. Work effectively as an independent and interdependent researcher and research collaborator

Practical and/or professional skills and attributes (D)

- D1. Apply current technologies to enhance research and be fully computer literate
- D2. Recognise the limitations, contradictions and gaps in a complex argument
- D3. Retrieve, process and manipulate information from a variety of valid sources

5. TEACHING, LEARNING, AND ASSESSMENT

Teaching and Learning Strategy

The teaching and learning strategy aims in the most effective and efficient ways to provide a framework of knowledge within which student can take responsibility for their own learning, to introduce students to the latest thinking and research, to give opportunities for students to consider and evaluate the issues and to explore them further with their peers and lecturers. To achieve these aims the teaching and learning will include:

- Group sessions that are designed to provide an overall framework of the existing knowledge and which will give sufficient information for students to follow up details independently
- Large group sessions that will introduce students to new issues, controversial topics, recent research, etc., that are not dealt with in the existing literature
- Small group sessions that will give opportunities for students to discuss and demonstrate their learning with their peers and lecturers
- Individual supervision in which students will be able to explain, discuss and refine their ideas

The strategy for each individual course is designed to contain a mix of teaching and learning methods to provide a rich and varied learning environment. Sessions may take the form of traditional lectures, seminars, tutorials, workshops or they may be delivered through paper or electronic media. The combination of teaching and learning approaches, detailed above, develops students' knowledge, critical and analytical skills and practical skills. These include presenting an overview of a topic, encouraging concentration, note taking and sifting of information. The use of case studies within seminars encourages the application of knowledge to real life situations, independent learning, group cooperation, imagination and original thinking.

The teaching and learning strategy for the MA in Film: Science Fiction and Fantasy degree is based on the understanding that all students are active learners and researchers and are embarking on advanced professional practice with a view to their future career development. This is designed to maximise student engagement in the programme and ensure full participation throughout. The precise approach will vary from course to course, but the learning outcomes relating to each class are designed to ensure that students immerse themselves fully in the subject and take full responsibility for their progress through the programme. The concept of progression through the distinct aspects of the degree (class-based learning focusing on theory and practice, guided independent study and practical work, internship and professional research project including a critical reflection) is integral to the intellectual journey that the students will make during their time on the programme.

A variety of approaches will be used in teaching, including:

- Formal seminars and debates
- Formal lectures, supplemented with audio-visual materials
- Informal lectures and discussions with guest speakers or on visits
- Individual and group projects, culminating in oral presentations and written work
- Group and individual tutorials
- Self-directed and directed reading

Student knowledge will be acquired through:

- Structured seminars and debates (including the sharing of other students' learning and experience), lectures, guest lectures, visits to agencies – including supporting materials
- Directed reading and use of electronic sources
- Independent research and work experience

Student thinking skills are developed through:

- Undertaking practical exercises and making presentations
- Learning alongside others, including group work, seminars, debates and discussions
- Conducting research
- Preparing assessed work

Student practical skills are developed through:

- Applying theory to practice in practical exercises and assessed work
- Specific training related to PR and journalism and related fields, including the use of different media
- Team and individual project work and reflection thereon
- Vocational experience gained through internships

The University welcomes applications from students with disabilities. These disabilities might include a physical or sensory impairment, a medical or psychiatric condition or a specific learning difficulty such as dyslexia, and may require additional support or adaptations to our facilities. Richmond endeavours to make all practical and reasonable adjustments to ensure students are able to fully participate in the University community.

Assessment Strategy

Assessment is by examination, essays, dissertations, and other forms of written work; oral presentations and group work; as well as projects and this assessment strategy usually meets the University Assessment Norms at level 7.

As seen above, the University places considerable emphasis on developing its students' learning and skills. Creating independent thinkers is a part of the University's mission statement and MA academic staff deliver on this promise in a number of different ways at the postgraduate level. A key aspect of their work involves devising methodologies, consistent with best-practice approaches within the field, with which to adequately assess students' performance. These approaches include the setting of learning outcomes encompassing each course as well as regular discussion and interaction amongst academic staff in order to set common goals for the entire degree and each of its courses.

In terms of following up with the assessment of student learning and consistent with US Liberal Arts traditions, MA classes rely on the system of continuous assessment on a course by course basis and throughout any given semester. This approach often involves the use of

short essays, research papers, learning journals, annotated bibliographies, gallery reviews, book reviews, student presentations, research proposals and general class discussion. Not every component applies to every course, but most do relate to many of the classes that are offered. There is an emphasis on writing essays, particularly research papers, at postgraduate level, and reflective work including learning journals.

The variety of instruments used permits academic staff to assess each student's developing and evolving knowledge and skills base as outlined in the previous section. For example, the research paper tests for, amongst other things, a student's ability to engage with primary and/or secondary sources of information and his or her ability to evaluate and analyze this. Site visits encourage students to engage with objects, applying theory and method taught in classes. In addition to this, the University sets specific guidelines on the weighting of coursework in order to effect balance in the process of assessment. As the coursework load for each course set out in the course descriptor shows, a variety of assessment strategies with weighting spread facilitates this across the courses, with the typical course settling for around 50% for the final research paper.

A component part of the programme's efforts to ascertain an appropriate approach to the assessment of student learning involves the use of grade descriptors (made available in the Student Handbook). This information allows the student to see the expected level of performance that co-relates with a particular letter grade summarizing his or her overall achievement level. The programme also has a formalised system of exit questionnaires and feedback meetings punctuated at key moments throughout the year (mid-semester break, end of semester and end of year) for its students as a framework through which the views and opinions of those who have experienced the programme, as students, can be captured and responded to. Evidence of this approach in action is demonstrated in minutes of meetings with students and academic staff and response to comments from the External Examiner.

The academic staff are confident that the assessment processes are sound. Much of this confidence emanates from the comments MA academic staff have received from External Examiners. But an equally important measure is the success that so many students on the Master of Arts programmes enjoy beyond their post-Richmond experiences. Those students judged as the strongest generally move on to take on challenging opportunities on postgraduate programmes and as professionals in the arts and creative cultural industries. This is testimony to their level of preparedness for the real world of careers in the visual arts, and are an indication of the academic staff's and University's ability to fulfil its mission.

Academic Standing

A	4.000	Excellent
A-	3.666	Excellent
B+	3.333	Good
B	3.000	Good
B-	2.666	Good
C+	2.333	Satisfactory

C	2.000	Satisfactory
C-	1.666	Below average (may only be awarded at graded activity level)
F	0.000	Fail (may be awarded at graded activity level, and awarded at
FA	0.000	Fail (Attendance)
FS	0.000	Fail (Non-Submission)
FX	0.000	Fail (Academic Misconduct)

A graduate student is in good academic standing if maintaining a cumulative Grade Point Average (GPA) of 2.0 (C).

Graduate students with a cumulative (GPA) of less than 2.0 (C) risk dismissal from the university (see below under “Grade Point Average” and “Academic Probation”).

Grade Point Average

A grade point average (GPA) is calculated each semester and summer session and is recorded on the student’s transcript. A cumulative GPA, including all graduate courses taken at Richmond, is also calculated. The numerical equivalent for the grade (see above) of each course is multiplied by the number of credits for that course to give the number of quality points for the course.

The GPA is then the sum of quality points for all courses divided by the total number of credits of all courses attempted.

- Students achieving a minimum cumulative GPA of 3.333 will be awarded the degree with Distinction.
- Students achieving a cumulative GPA within the range of 2.667 to 3.332 will be awarded the degree with Merit.
- Students achieving a minimum cumulative GPA within the range of 2.0 to 2.666 will be awarded a Pass degree.
- Students achieving a cumulative GPA of less than 2.0 will fail the degree.

Students who choose not to submit the Professional Project, or who do not obtain a minimum grade of C (2.0) on the Professional Project, may transfer programs and apply to receive a (US) Postgraduate Certificate. A minimum cumulative GPA of 2.0 on all coursework is required for the award of the Postgraduate Certificate. Students must successfully submit and have approved a research proposal before progressing to the Professional Project.

6. ENTRY REQUIREMENTS

Details of the entry requirements, including English language requirements, may be found at the appropriate page of the University website listed below, where a comprehensive Admissions Policy and Summary of Practice document is also published.

<http://www.richmond.ac.uk/admissions/postgraduate-admissions/>

7. STUDENT SUPPORT AND GUIDANCE

There is a range of student support and guidance, for both academic and general wellbeing, available to students. This is accomplished through a range of programmes and services that positively impact learning as well as the total student life experience.

All students have an allocated full-time faculty member who acts as their Programme Director. Programme Directors have on-going responsibility for students' academic progress, meeting with each student at least once per semester. Programme Directors assist students with registration, enabling smooth progression through the degree. They also advise on career opportunities, and also provide pastoral support in many cases.

A range of Maths, English, Technology and Writing workshops have been established to support students with particular needs in these areas. Librarians are on hand to assist with library use, which includes instruction in web-based resources.

The University endeavours to make all practical and reasonable adjustments to ensure students are able to fully participate in the University community. Students who declare a physical disability or a special educational need are supported to ensure the quality of their educational experience meets their individual requirements. SEN students, for instance, receive extra time in examinations, and have the option of writing exams on university-provided computers, and/or of taking exams in a separate room.

The University operates a well-staffed Student Affairs department that provides services intended to support and encourage student welfare, safety and development. This department oversees medical registration of students and provides counselling services. It also organizes a range of extracurricular activities and travel designed to further enhance students' educational experiences. Disciplinary and social grievance procedures are also overseen by this department.

8. INTERNSHIPS

The Careers & Internship Office of the University offers a formal mechanism through which students may receive work-placement opportunities. These placements are supervised, career-related work experiences combined with reflective, academic study that help students apply theoretical knowledge in the workplace. Participation in the internship programme is optional but highly encouraged because the Masters Programmes have been designed to offer students the option to graduate with both a qualification as well as experience of the workplace.

Programme specification and curriculum map – MASTER OF Film: Science Fiction and Fantasy Degree

The internship has been established to act as a conduit between the classroom and a career, enabling students to meet and work with potential future employers. The internship programme demands that students interact with professionals in their field, allowing them to learn by seeing as well as by doing. Key to the success of this initiative is the relationship that has been developed with organisations and governmental agencies.

Expectations with regard to careers education, information, advice and guidance (as outlined in The UK Quality Code for Higher Education) are handled by the university's Student Affairs department. This department conducts a variety of career services for students, ranging from resource provision to a CV service, and in particular through the professional development seminar series. For full details of career services offered to students at Richmond may be obtained from the Student Affairs Department.

In addition to these services, the alumni office offers networking opportunities where students may contact alumni working in a variety of fields. The alumni office also offers these services via social media such as LinkedIn and Facebook.

9. POSTGRADUATE ACADEMIC POLICIES

Please see the Policies page on the University website listed below for the relevant academic policies of this programme. (<https://www.richmond.ac.uk/university-policies/>)

10. REGULATORY FRAMEWORK

The Master of Arts **Film: Science Fiction and Fantasy** is operated under the policy and regulatory frameworks of Richmond American University in London, the Middle States Commission on Higher Education, the Framework of Higher Education Qualifications, and the UK Quality Code for Higher Education.

Also key to the background for this description are the following documents:

- QAA (2018). The Revised UK Quality Code for Higher Education. (www.qaa.ac.uk)
- QAA (2008). Higher Education Credit Framework for England: guidance on academic credit arrangements in Higher Education in England.
- SEEC (2016). Credit Level Descriptors for Higher Education. Southern England Consortium for Credit Accumulation and Transfer (www.seec.org.uk).
- Middle States Commission on Higher Education. Standards for Accreditation and Requirements of Affiliation. 2014: Thirteenth Edition; Rev. Ed. 2015. (<http://www.msche.org/publications/RevisedStandardsFINAL.pdf>)

Ensuring and Enhancing the Quality of the Programme

The Master of Arts **Film: Science Fiction and Fantasy** features detailed published educational objectives that are consistent with the mission of the institution. All course outlines contain

Programme specification and curriculum map – MASTER OF Film: Science Fiction and Fantasy Degree

course specific objectives that are regularly monitored by the individual instructors and by the faculty as a group.

The University has several methods for evaluating and improving the quality and standards of its provision. These include:

- External Examiners
- Internal Moderation
- Student representation
- Curricular change approval process
- Annual Programme Monitoring and Assessment
- Formal Programme Review, every 5 years
- Course evaluation
- Student satisfaction surveys and the NSS
- Feedback from employers

The Master of Arts **Film: Science Fiction and Fantasy** is provided through a system of ongoing evaluations that demonstrate achievement of the programme's objectives, and uses the results to improve the effectiveness of the programme. Ongoing evaluation is carried out for both US (the Middle States Commission on Higher Education) and UK (QAA) reviews. The University is a voluntary subscriber member of the QAA, and underwent its first full Institutional Review in May 2013 and a Higher Education Review (AP) in 2017.

In this document and other University literature, US credit is articulated in terms of US and UK credit frameworks.

At the Masters degree level (see below for discussion of Levels on the FHEQ), UK MA students obtain a minimum total of 180 UK credits, which equates to 90 ECTS credits or 36 US credits.

American Masters degrees typically award 30-36 credits. Richmond's degree awards 36. The ratio for credit translation at the Masters level (Level 7) is therefore as follows:

	US credit	ECTS credit	UK credit
UK Level 7	1	2.5	5
Required minimum number of credits for MA	36	90	180 (120 of which must be at Level 7)
Richmond MA in Film: Science Fiction and Fantasy	36	90	180 (at Level 7)

Levels

The FHEQ (Framework for Higher Education Qualifications) in the UK defines Higher Education levels in the following way:

Programme specification and curriculum map – MASTER OF Film: Science Fiction and Fantasy Degree

- Levels 4-6 (previously HE1-3) – years 1 to 3 of a UK undergraduate degree
- Level 7 (previously M) – UK Masters degrees and postgraduate diplomas and certificates
- Level 8 (previously D) – UK Doctoral degrees

Each level is illustrated by, and each award determined by, reference to a qualification descriptor. The level 7 descriptors can be found on pages 20-23 of the FHEQ (QAA, August 2008).
